

Gauge force tester for external micrometers

Order data

Order number	481346
GTIN	4045197286574
Item class	42K

Description

Version:

The measuring force tester provides for simple evaluation of the forces acting on the measuring faces. **According to DIN 863 T1** the measuring force has to be between 5 and 10 N.

Optional extras:

Extensions No. 481348 for larger measurement ranges.

Technical description

Material	Stainless steel, INOX
Measurement technology	analogue
Calibration	B12
Type of product	Measuring force tester for external micrometer

Services

Calibration Measuring force tester	012070
Labelling laser-etched Type	018940

Calibration Measuring force tester Type M

022580 M

Accessories

Extension for force gauge tester for measuring range
50-75 mm

481348 50-75

Extension for force gauge tester for measuring range
25-50 mm

481348 25-50

Extension for force gauge tester for measuring range
75-100 mm

481348 75-100
