

## Disc brush with shank, ceramic grit (CER), Ø 25 mm, Grit: 80

## **Order data**

| Order number | 575024 80     |
|--------------|---------------|
| GTIN         | 4062406120412 |
| Item class   | 51P           |

## **Description**

#### **Version:**

Disc brushes with **extremely tightly packed abrasive bristles (right to the edge of the brush)** embedded in the plastic pad. The bristles support each other, giving a **highly stable shape**. Very long working life.

6 mm shank, solidly cast in place.

Nylon bristles with **ceramic grit content.** More aggressive abrasive effect.

#### **Advantage:**

- · Workpiece post-processing directly after the machining process.
- Reproducible results due to continuous exposure of the abrasive grit.
- · Process reliability thanks to high stability and accuracy of the shape.
- Quick and secure mounting without further accessories.
- Very high concentricity.

### **Application:**

On **CNC** machining centres and when used by **robots**, preferably **wet grinding** with cooling lubricant. Machining of flat components: precise **deburring**, **edge rounding**, **finish machining** after milling, **surface finishing** e.g. of sealing and mating faces.

#### Note:

Special versions available on request.

Grinding medium code: Ceramic

Bristle length L<sub>3</sub>: 25 mm

Shank Ø D<sub>s</sub>: 6 mm Grit designation: coarse Bristle thickness: 1.2 mm

# **Technical description**

| Infeed                   | 0.3 (fine) – 2.0 (coarse) mm  |  |
